

Our GSM (Guaranteed Success Methodology)

We have a 100% success record of getting businesses through their ISO Certification Audits at the first attempt (we don't intend to ever have a 99% success record)

Initial online assessment – designed to produce two outcomes

- 1) You gain an understanding of the ISO requirements
- 2) We can determine exactly where you are right now

Two concurrent workstreams – we can then commence

- 1) The development of generic ISO requirement driven by ourselves
- 2) Your definition of core operational Best Practice, guided by ourselves

Pre-Audit – we pre-audit the developing system before submitting to a Stage 1 (“document review”) ISO Audit

Pass Stage 1 Audit – we go to audit confident that no stone has been left unturned and that we will pass the audit, securing passage to Stage 2

Implement ISO improvement processes – we “launch” your system within your business and agree the best way to implement ISO improvement processes and test your system

Pre-Audit – we pre-audit the current system ensuring all requirements have been satisfied prior to a Stage 2 (“live test”) audit

Pass Stage 2 Audit – we go to audit confident that we can demonstrate our ISO compliant management system!
